Salt tolerance

Close mowing tolerance

Very good persistency and density

BOGART is a very high quality lawn variety. A very high density combined with an excellent persistency ensures a good and strong lawn for private gardens and in parks in every situation with a high visual merit.

Excellent disease resistance

Red Thread is a serious disease especially for the species red fescue. A high resistance to this disease secures an excellent appearance throughout the year. BOGART has an excellent resistance to this disease, that is what makes it a top quality variety.

And it has been tested and proved to be one of the best on the Dutch List (GrasGids) in lawn trials. Use BOGART and it will keep your lawn healthy.
