Red thread tolerance

Salt tolerance

Close mowing tolerance

Great Appearance

Very constant greenness throughout all seasons makes WAGNER 1 a very even and universal variety. The high shoot density guarantees a dense sward. A nice appearance with a good sward density gives a nice ornamental lawn. But also in the category and testing series concerning close mowing WAGNER 1 proves a good performance. At the STRI List it ranks three of the new entries 2011.

Good performance

In total that gives a very good overall performance of WAGNER 1 in lawns as well as under close mowing management, which makes WAGNER 1 the number 1 choice as a mixture prepared for all missions. Another advantage is the good salt tolerance of WAGNER 1.

Dense with a nice green and shiny appearance

Dense with a nice green and shiny appearance
