

SERGEI

Festuca rubra rubra

Top rated at the STRI

SERGEI is rated 7th on the Lawns and Landscaping List in the STRI Turfgrass Seed 2024. This highly respected list is the industry reference for turfgrass varieties not only in the UK but across Europe

SERGEI is well rated for both shoot density and visual merit.

The highlight is its resistance to the common disease red thread and the production of fewer clippings which make it sustainability and environmentally friendly

As with all creeping grasses it gives stability to the turf and is self repairing

SERGEI is an excellent variety for inclusion in mixtures for hard wearing lawns and landscaping
