### Wear tolerance

### Rust tolerance

### Colour

### Red thread tolerance

### Salt tolerance

## Perfect for mixtures with tall fescue

EVORA has medium density and the leaves are quite large. This gives a very homogeneous aspect when mixed with tall fescue.

These two species are also a perfect fit for hot and dry conditions where they match each other to produce the best possible turf summer and winter.

## Allround nice and dense variety

As tall fescue, *Poa pratensis* contributes to increased wear tolerance allowing use for playgrounds and sport fields.
