Fast establishment

Quick Facts

AXCELLA 1 is an advanced turf type annual ryegrass. It was developed from unique dwarf annual ryegrass plants that exhibit greater shoot density, narrower leaf blades, less vertical leaf growth, and a darker green leaf colour than standard annual ryegrass cultivars.

Strong seedling vigour

AXCELLA 1 exhibits strong seedling vigour for a weed free turf that requires less pesticide use.

Exclusively for winter overseeding

AXCELLA 1 features dense durable turf, reduced athletic field wear, and a more aesthetically appealing turf. AXCELLA was developed for winter overseeding of dormant bermudagrass and other warm season turf and where rapid spring transition is desired. Later it has shown fantastic opportunities for cool season pitch recovery.

Recommended use

It is best utilized on athletic fields, play grounds and home lawns mowed at 1,5 cm or higher. It is THE choice for recovery and prevention of damaged areas when standard solutions are insufficient.

Axcella compared to ordinary annual ryegrass

	Leaf texture	Colour	Density	Vertical growth
Ordinary annual	Coarse	Medium	Open	High
Axcella 1	Fine	Darker	Denser	Medium
